

A short bibliography for population genetics, diffusion limits and degenerate diffusions

Models in Population Genetics:

W. EWENS, *Mathematical Population Genetics, I, 2nd edition*, vol. 27 of Interdisciplinary Applied Mathematics, Springer Verlag, Berlin and New York, 2004.

R. DURRETT, *Probability models for DNA sequence evolution*, Probability and its Applications (New York), Springer, New York, second ed., 2008.

R. DER, *A Theory of Generalised Population Processes*, PhD Thesis, University of PA, 2010.

Diffusion limits:

R. DURRETT, *Stochastic calculus*, Probability and Stochastics Series, CRC Press, Boca Raton, FL, 1996. A practical introduction.

S.N. ETHIER AND T.G. KURTZ, *Markov processes: Characterization and convergence*, Wiley Series in Probability and Mathematical Statistics: Probability and Mathematical Statistics, John Wiley & Sons Inc., New York, 1986.

R. DER, *A Theory of Generalised Population Processes*, PhD Thesis, University of PA, 2010.

Analysis of degenerate diffusion operators:

W. FELLER, *Two singular diffusion problems*, Ann. of Math. (2), 54 (1951), pp. 173–182.

W. FELLER, *The parabolic differential equations and the associated semi-groups of transformations*, Ann. of Math., 55 (1952), pp. 468–519.

C.L. EPSTEIN AND R. MAZZEO, *Wright-Fisher diffusion in one dimension*, SIAM J. Math. Anal., 42 (2010), pp. 568–608.

C.L. EPSTEIN AND R. MAZZEO, *Degenerate Diffusion Operators Arising in Population Biology*, to appear Annals of Math Studies, Princeton U Press, 2012. preprint available at arXiv:1110.0032v1.

LINAN CHEN AND DANIEL STROOCK, *The fundamental solution to the Wright-Fisher equation*, Siam J. Math. Anal., 42 (2010), pp. 539–567.
